Education

Kashi Institute of Technology, Uttar Pradesh, India **Sep2022 -Mar2026**

Bachelor of Technology(B.Tech) | Computer Science and Engineering| CGPA - 8.10

Class 12th |CBSE | 82.4% |Mar2021 Class 10th |CBSE | 88.4% |Mar2019

Technical Skills

Programming Languages: C, C#, Java, JavaScript, Typescript, HTML5, CSS3.
Frameworks & Libraries: React.js, Express.js, Node.js, TailwindCss.
Tools : Git, GitHub, Postman(API testing).
Databases: MongoDB,MySQL.
Concepts: Object Oriented Programming (OOPs), Authentication & Authorization , Data Structures.

Experience

Mixins Technology | Maharashtra Pune India **Aug2025- present**

Software Engineer Intern **|**React.js,TailwindCss, API Handling ,Bugs Fixing **|**

- Develop and maintain responsive user interfaces using React.js and Tailwind CSS, ensuring component reusability and consistent UI behavior.
- Performing UI debugging and issue resolution, improving front-end performance, and user experience across multiple screens.
- Integrated REST APIs using Axios and tested endpoints through Postman, ensuring accurate data handling, error management, and smooth frontend-backend communication.
- Collaborated with cross-functional teams to analyze requirements, resolve defects, and deliver feature updates within deadlines.

Projects

Basketo –An E-commerce Project | MERN Stack ,TailwindCss,Git| **Aug2025-Dec2025**

- Basketo is a fullstack Ecommerce platform designed to bring local shopkeepers into the digital ecosystem.
- The project uses JWT based authentication, optimized API endpoints, and smart data modeling to support fast queries.
- Key modules developed:

  Customer Module – Shop view, product view, filters, cart system, order placement.

  Seller Module – Product management, offer creation, transaction logs, dues management.

  Admin Module – Category control, Transaction management, package management, shop verification.

Hospital Management System-Appointment Scheduling Project| MERN Stack ,TailwindCss ,Git| **Oct2025-Nov2025**

- Developed a full-stack hospital management system using the **MERN stack**, featuring separate dashboards for Admin, Doctor, and Patient with secure authentication and role-based access.
- Created doctor dashboards to **view and manage assigned appointments**, enabling efficient handling of patient consultations.
- Built patient functionality to **create accounts, book appointments, and manage their appointment history** .
- Designed admin workflows to **manage patient records, schedule appointments, and assign doctors**.

Employee Management System-Task Allocating Project |React.js ,TailwindCSS ,Git| **Aug2024-Sep2024**

- Developed an employee task allocation system with role-based access, enabling Admin and Employee-specific dashboards.
- Built interfaces for **creating, assigning, and tracking tasks**, ensuring smooth task management & updates.
- Implemented responsive UI components using **React.js and Tailwind CSS, Local Storage** (to Store JSON data) .

Achievements

ABHYUDAY'23 –Hackathon **Sep2023-Sep2023**

The state level fest,and I Participated in Code Master(Coding competition) Secured: 2nd Rank(Silver Medalist).

Certifications

- **Employment Enhancement Programme-SoftSkill Training|By- CentumFoundation & Infosys** | **Aug2025-Sep2025**
- **Bharat Intern – Remote Internship|Frontend Developer** | **Jan2024-Feb2024**
